

WEB BTi Energy Manager

Making Energy Management Easy

BTi Energy Manager uses the power of the internet to take the energy usage reporting features of the ACU Multi-Circuit Meter to the next level.

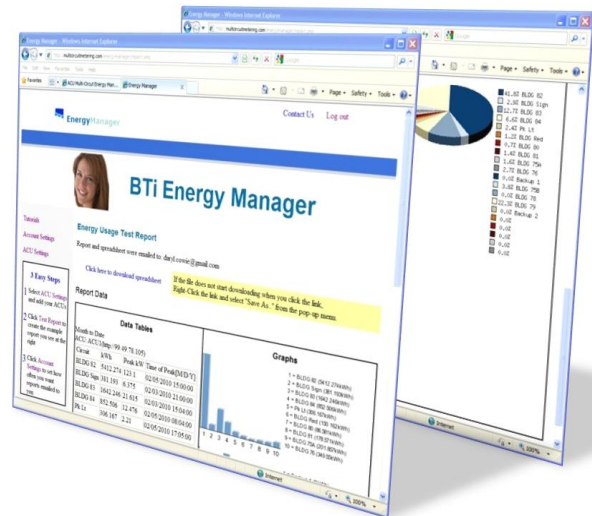

Energy Manager gives you the ability to look across multiple ACU's anywhere in the city, state or country providing a wide view of your system with system level reports.

- ▶ Manage multiple ACU Multi-Circuit Meters from a single website
- ▶ Have energy usage reports emailed to you automatically
- ▶ View summary graphs of reported data
- ▶ Push reports to FTP servers automatically
- ▶ Generate consolidated reports combining data from multiple ACU meters

Automatic Configuration

BTi Energy Manager makes accessing your data a breeze.

- ▶ Internet connected ACUs self-register to start reporting automatically
- ▶ Each email contains a link to the BTi Energy Manager administration page

Harness the Power of the ACU Multi-Circuit Meter with BTi Energy Manager

WEB BTi Energy Manager

Energy Reporting as Easy as 1-2-3

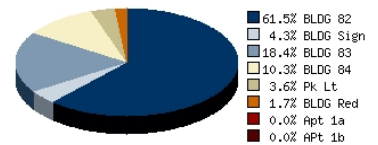

METHOD 1 - Automatic email of Consolidated Energy Usage Reports

Reading all your meters is as easy as reading an email.

- ▶ Summary graphs in message provide a quick overview
- ▶ Detailed spreadsheet attachments with the detail you need

BTi Energy Manager puts all your ACU readings together in one report, or you can keep them separate ... it's all up to you.

METHOD 2 - Automatic Report Transfer to a PC Folder

Our special FileGrabber application puts energy usage data right in a folder on your PC automatically, as often as you'd like.

- ▶ Open the folder on your PC and viola, the latest data is there
- ▶ File names include time and date providing an automatic historical record

No FTP server required.

METHOD 3 - View Energy Usage at Any Time with Your Web Browser

Your personalized BTi Energy Manager Website has all the information you need.

- ▶ View real time energy usage data online
- ▶ Download spreadsheet reports to your computer
- ▶ email reports to yourself
- ▶ Link directly to individual ACU WebView pages for maximum detail
- ▶ Use your web link for remote diagnostics
